

Tribute to Grandparents and parents

I am a third-generation doctor in my family starting from my grandfather (mom's dad) who following graduation from Bombay university did a Diploma In education from University of Scotland, Edinburgh 1-1/2 years 1937-38 and later became the director of Education in Bombay presidency after the independence of India.

Mother was a GYNECOLOGIST MBBS from BJMC and she was a woman with grit and determination to pursue her DGO from KEM AND Wadia after marriage. I have seen my father always encouraging her. She was Rh -ve and I was in UTERO when she was studying for her DGO. With spotting and bleeding PV on and off she was in double minds whether to continue the pregnancy or not. Her gynec advised her to undergo MTP and she was scheduled for it. On the day of the surgery on the OT table, she changed her mind and got off the table and refused to undergo MTP and here I am standing Infront of you all. Otherwise, I would have been somewhere as abortus in the basket of the Operation theatre.

My Father who was an ADVOCATE, Notary Public BALLB, Municipal Councillor and chairman of Govt undertaking, on board of various committees, likes Censor board member, police public liaison committee zone 6. He was a strong pillar to my mom and always supported her in her endeavours of starting a dispensary, MTP Centre and Nursing Home. I realised the meaning of the word women empowerment from him.

My Father in law who passed away recently was a thorough gentleman and I do miss him as he could be present today at this august gathering. They all are looking up from the sky and might be happy to see me standing Infront of you all.

My mother In law is here today.. thanks for all the love and affection you both have given me and my dear wife Komal who has stood rock solid beside me.

Journey

My Journey as an MBBS student in Seth GSMC, Wadia Maternity & Post graduation MD, FCPS, DGO, DFP, FICOG at Sion Hospital and Rajawadi was a remarkable one with twists and turns. The 15 kg weight I gained during my internship was lost courtesy of Dr. Gautam Allahabadia and Dr Santosh Nikumbh. Dr P R Vaidya Mam was always motherly to me and I recollect, she used to ask me in the operation theatre whether I had had breakfast? Will you have something from my Dabba?

I bow down with folded hands to each one of them who carved and sculpted me to the place where I am standing today, in front of you as President of MOGS.

Dr ND Motashaw, Dr V N Purandare, Dr Shirish Sheth uncle, Dr Usha Krishna, I would like to take especially the names of Dr Anirudh Malpani & Dr Nozer Sheriar, the then Lecturers & Registrars in GSMC Dr Jatin Shah, Dr Monish Shah who used to take clinics for us as UG and PG students.

Dr Ajit Mehta Sir, Dr S N Daftary, Dr Shyam Desai, Dr M N Parikh, Dr C B Purandare, Dr Narvekar, Dr Vandana Walvekar, Dr Adi and Dr Nayana, Dr Mehroo Dara Hansotia, Dr Manju Mataliya, Dr P R Vaidya , Dr V R Badhwar, Dr V R Ambiye, Dr V D Patkar & Dr G M Niyogi, Dr PK Shah. -

Passion and zeal for academics, research and education is my forte was embedded in my soul by my mentors Dr P K Shah Sir and Dr C N Purandare Sir.

Seeing them working together on the stage of MOGS, FOGSI, FIGO and other Indian organizations, made me understand and realize my potential to serve our Women population and I am still learning and inculcating the good things taught to me by both of them.

Friends like dear Hrishikesh, Nandita, Rishma, Shantha, Jaydeep, and Bipin, have always guided, supported and encouraged me in my personal and professional growth.

Bhaskar, Arun, Rahul, and Prashant, Lalita, Raju are all very near and dear to me

My endoscopy Teachers in Rajawadi Dr Prakash Trivedi and Dr Prashant Mangeshkar in 1992 attracted me to the subject of endoscopy and later worked with Dr P K Shah at Sion Hospital and visualising the IAGE annual conference organised by Khandwala in 1992 sealed in my mind that yes I need to master endoscopy and this is my passion.

My journey in MOGS started in 1997 to be precise 25 years, working with 25 past president

I welcome the Office Bearers and Managing committee members

My MOGS Plan

Mogs 2022-23 Academic and social activities - workshop photos

We have this year, #MogsTrendz Kiosks, where we can Click photos at the hotel venue and upload it with hashtags #Vision4HER & #MOGSTRENDZ on MOGS Social media handles Twitter, Facebook & Instagram. to win exciting prizes at the Valedictory ceremony.

We have tied up with Radio Big Fm
For snippets and podcasts on Women's health issues during the year.

Today, I see three reasons for optimism.

First, I see a new era of cooperation to achieve the Sustainable Development Goals. We have always spoken of global leaders joining hands for achieving the health management goals

So far, leaders of global health agencies – including FIGO, WHO, ROCG, RCPI, JHPIEGO and others in this room – have come together in support of the plan, to commit to working together in closer cooperation, instead of in a fragmented and disjointed way.

Second, I see new technologies that offer us the opportunity to reach everyone with health services and health information, from the biggest cities to the remotest villages. During the lockdown, we ran the TOG webinars/ TASK Series/ Endos Premier League and more than 400 webinars. All of us reached out to each other's crossing boundaries of nations & I would have connected at least a couple of thousands.

And third, I see you. I see the people in this hall. I see us. I see the people I have met all over the world who share a singular commitment to achieving better health – for themselves, their families, their communities, their nations and their planet.

You are our hope. No one else will achieve the ambitious vision of health for all. It's up to us.

History will record us as the generation that was given a second chance of achieving health for all.

Will it record that we wasted the opportunity? Or
Will it record that we made it happen?
Let's start writing that history now.
Let's make it happen.
Let's treat HER.
That's my vision.
It's HER STORY.

HEAL HER
EDUCATE HER
RESPECT HER

Thank you all.

I would now request the dignitaries on the zoom platform from across the globe,
live, watching me for their blessings

I am honoured and thankful for your gracious virtual presence and for giving your
valuable time to me...

DrJeanne Conry, Fionnula, Asma
Dr Arul Sir
Dr CN Sir
Dr Patrick Obrien sir
Dr Rohana Sir

As Lecturer, AP, Professor and Unit Head, I met so many friends and colleagues on
my journey in life. I can't name each one of you but you all have been supportive of
me.

I would like to thank my HODs at Sion hospital Dr P R Vaidya, Dr V R Badhwar, Dr
P K Shah, Dr Niranjana Mayadeo, Dr Arun Nayak, Dr Shirodkar madam and most
importantly Dr Y S Nandanwar Sir & Dr Mayadeo who have harnessed my potential
to start Infertility and Endoscopy courses recognised by MUHS and later followed
by Advance Minimal access Gyne surgery courses with Hands-on training.

I would like to thank the small world I live in, my family, unit and MOGS office.

I would request all of my dear friends, colleagues and seniors to please wait for the
customary personal congratulations for an hour till we finish with the Inauguration of
the conference and the 2 orations by the FIGO President and FOGSI President.

Thank you.
